

Hello from the Team at PMC!

Looking for a solution that could help your business run more efficiently?

A scanner could do that very task for you! Everything from inventory to monitoring stock levels. So whether you're already sold on how good they are and need an upgrade or have been thinking they might be the way to go, then take a look through our newsletter to see what we've got.

AiGather have a range of scanners that are either desktop or handheld.

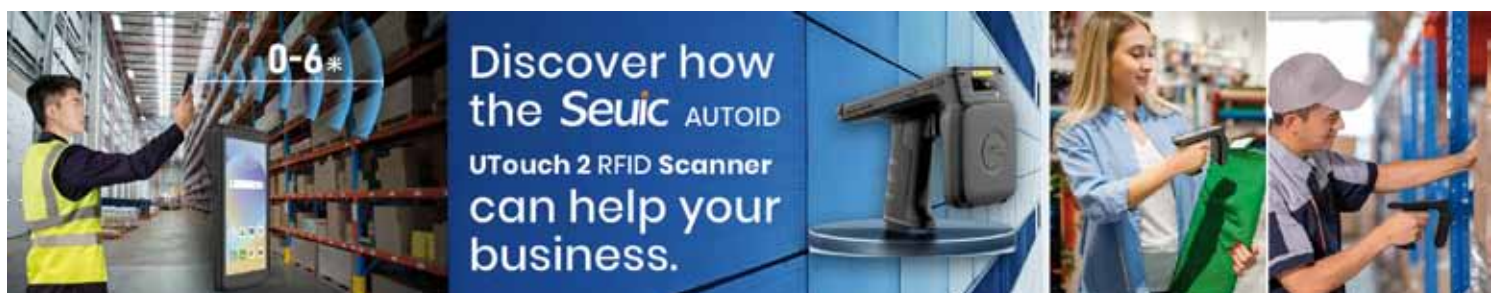

A-22 Desktop Wireless 2D Barcode Scanner is not only ultra-thin and foldable but packed with features for the price. Advanced decoding algorithm with a large reading angle provides smooth decoding during scanning.

- Quickly reads even poor-quality product barcodes.
- The large-capacity battery.
- Two wireless transmission methods, 2.4G and Bluetooth, are available.

The **A-9522BTSR Bluetooth 2D Barcode Scanner** with a new button design and high-rebound switch components, fits perfectly in the palm of your hand.

- Equipped with advanced decoding algorithm patented by AiGather, easy to read barcode, QR code, DM, PDF417, etc.
- Supports many keyboard languages, no driver required, just plug and play, compatible with major operating systems.
- Large-capacity battery. The effective transmission distance in open space can reach 100 meters; Bluetooth can reach 50m in open space.
- Long depth of field, large field of view, easily scan barcodes at distance.

How could the **Seuic AUTOID UTouch2** HELP YOUR BUSINESS ?

See how Seuic and the Utouch2 RFID Scanner transformed their coffee chain business

1. **Improve manual error tasks when stocktaking/inventory** - Scanning with the Utouch2 RFID system reduces manual errors and ensures stock accuracy across all product lines.
2. **Save time** - Inventory tasks that previously took 25–40 minutes now take 1–2 minutes by using the Utouch2, freeing staff to focus on customer service or other areas of the business.
3. **Training of New Staff** - Due to the variety of packaging materials and barcode positions, barcode scanning required experience and training. This increased onboarding time and made it difficult to maintain accuracy with new or temporary staff.

The Utouch2 RFID system makes this process easier.

Every business wants to run more efficiently and needs everyday tasks to be less time consuming and easier to perform.

Both these products could help you do just that.

AUTOID UTouch2 Key Features

Qualcomm 8-core 2.0GHz
Runs smoothly with multiple apps

11700mAh Dual-battery
Supports long shift work

Group reading 950 tags/s
Recognition distance up to 20m

IP67, 6.5 ft./2m drops to concrete
Ultra-high protection, no fear of harsh environments

The AUTOID UTouch 2 is a next-generation UHF RFID reader with significant improvements over its predecessor. It can read up to 1300 tags per second and allows for easy switching between different reading scenarios with a single tap.

The device supports various special tags and features an upgraded algorithm for precise item identification according to your needs.

Equipped with an octa-core processor and Wi-Fi 6, it performs exceptionally well in complex environments.

The 11,700mAh dual battery provides strong support for continuous operation and the device is built to withstand drops from up to 2 metres onto concrete.

This combination of features makes it a game-changer in the marketplace.

AUTOID UTouch 2-S, brings new features for short range UHF reading of 6m back toward an object and 3m vertical, which expands user application for different scenarios, pocket design to carry everywhere at any time.

Ergonomically designed to tackle day to day challenges, with a non-slip wavy groove and honeycomb texture on the backside and top NFC for convenient card reading.

Supports IP68 and handles 1.8 m drops to concrete, frontline workers can use worry-free.
